

Training Day – 15

Today's training focused on continuing the **AWS Academy** learning program and developing a stronger understanding of fundamental AWS concepts and cloud technologies.

Work Undertaken:

- Continued studying the **AWS Academy course modules** to build foundational knowledge of AWS and cloud computing.
- Explored the concepts and topics covered in the assigned AWS Academy modules to understand how different AWS services and cloud technologies are used.
- Strengthened my understanding of fundamental **AWS concepts, services, and cloud-based solutions** through structured course material.

Additional Learning:

The AWS Academy modules provided a structured approach to learning cloud computing and AWS technologies. The course content helped reinforce concepts learned during practical AWS sessions and provided a foundation for further exploration of AWS services.

Conclusion:

The day was primarily focused on **structured AWS Academy learning**. Completing the assigned modules improved my understanding of AWS fundamentals and strengthened the theoretical knowledge required for working with cloud-based infrastructure and services.
